EXPERIENCE

Full-Stack Software Developer
Coder Foundry, Kernersville, NC

2023

- ❑ **Full-Stack Applications Development:** Pioneered the development of three comprehensive full-stack applications utilizing ASP.NET Core MVC. Seamlessly integrated front-end technologies such as Bootstrap, JavaScript, and HTML with Postgres databases, enhancing data management efficiency.
- ❑ **Project: [Bug Tracker](#):** Developed and led the Bug Tracker project, a platform that enables development teams to efficiently log, track, and resolve software bugs and issues. Facilitates collaboration among team members by providing detailed tracking of the status of each bug, ultimately enhancing application quality and reliability.
- ❑ **Continuous Integration/Continuous Deployment (CI/CD):** Orchestrated the implementation of CI/CD pipelines via GitHub, enabling seamless feature integration and ensuring the applications are consistently up to date.
- ❑ **Front-end Development:** Exhibited proficiency in Vanilla JavaScript by architecting several dynamic front-end applications, underscoring a robust understanding of JavaScript fundamentals.
- ❑ **Website Deployment:** Successfully deployed and maintained websites on Railway and Netlify, guaranteeing reliable online availability and accessibility.
